

FlexoArt Chamber System

Perfect doctoring - Cost effective - Truly ink tight system

- Perfect inking, perfect doctoring and extremely long blade life due to very low pressure and unique construction.
- The 'non-pressure' system has a completely sealed inner and outer chamber for a truly ink tight system.
- Patented two-component end-seals keep the ink on the screen roller surface.
- Extremely rigid construction prevents vibrations and bending of chamber during operation.
- Reliable and uncomplicated system, designed to meet the highest requirements for quality and profitability.
- The most flexible chamber system on the market, easy to retrofit in almost any flexo print unit.
- Cold formed stainless steel construction prevents corrosion and warping of chamber.
- GripTite® doctoring system for quick and easy service and maintenance.

flexoArt
Graphic Systems

The most flexible chamber system on the market. Ingenious fitting system allows installation into most flexo presses. The supporting tube makes the system extremely rigid.

Low weight chamber - easy releasing, removing and handling of press.

Easy to set - adjust for wear only once or twice per shift.

Truly ink tight - a "dual chamber" configuration in stainless steel ensures driplless ink metering.

Quick connector - for easy tube connection and fast release of ink.

Quick and easy change of blades- due to unique GripTite® doctor blade system.

Long life end-seals - cost efficient and easy to exchange.
