

PROTECT YOUR GREATEST INVESTMENT CUT-RESISTANT DOCTOR BLADE GLOVES

SAFETY+FIRST® Doctor Blade Gloves are designed specifically for use in flexographic and rotogravure pressrooms. They are a great asset for safely handling both steel and plastic doctor blades meeting international standards for ANSI L3 cut-resistance.

FEATURES AND BENEFITS

- ANSI L3 cut-resistance when handling steel and plastic doctor blades.
- Protects hands from harsh pressroom solvents, front and back.
- Improves grip when handling greasy or slippery objects.
- Soft and comfortable for extended use.
- Available in sizes M(09), L(10), XL(11)

SAFETY+FIRST® DOCTOR BLADE GLOVES

TECHNICAL SPECIFICATIONS

SAFETY+FIRST® premium cut-resistant gloves for handling doctor blades have been developed to provide both safety and dexterity needed in today's pressroom. These gloves are designed to help protect against cuts from plastic and steel doctor blades while reducing exposure to harsh pressroom chemicals - front and back.

TECHNICAL SPECIFICATIONS

Double Nitrile Coated

- Blue nitrile coating front and back of hand to wrist - protects against pressroom solvents and chemicals.
- Black textured nitrile coating covering palm and fingers for improved grip when handling oily objects.

Flexible HPPE 13 Gauge Dura-Weave Shell

- Greater flexibility for improved dexterity.

International Cut-Resistant Ratings

- UNITED STATES: ASTM (ANSI) LEVEL 3
 - EUROPE: CE RATING EN388
- | | | |
|----|----------------|--------------|
| CE | 5 : CUT-RESIST | 4 : TEAR |
| | 4 : ABRASION | 4 : PUNCTURE |

Available Sizes

- Medium (09), Large (10), and Extra Large (11)
