

FLEXOART® Doctor Blade Chamber

Most Adaptable Chamber System on the Market

The FlexoArt® doctor blade chamber system is designed with adaptability in mind to provide for perfect inking, perfect printing, and no leakage - for full size presses up to 3,000mm/120" print width.

This doctor blade chamber system is an easy-to-use solution offering low running costs, short pay-back time, and improved print quality.

Easy Use Benefits

- **Low Weight Chamber**
Easy releasing, removing, and handling of press.
- **Easy To Set**
Adjust for wear only once or twice per shift.
- **Quick & Easy Blade Change**
Due in part to unique GripTite® doctor blade system.
- **Truly Ink Tight System**
Dual chamber configuration in stainless steel ensures for dripless ink metering.
- **Quick Connector**
Easy tube connection and fast release of ink.

Standard Features

- The most flexible chamber system on the market that features an ingenious fitting system allowing for installation onto most presses.
- Perfect inking, perfect doctoring, and extremely long blade life due to very low pressure and unique construction.
- The 'non-pressure' system has a completely sealed inner and outer chamber for a truly ink tight system.
- Patented two-component end seals keep the ink on the screen roller surface.
- Extremely rigid construction prevents vibrations and bending of chamber during operation.
- Reliable and uncomplicated system, designed to meet the highest requirements for quality and profitability.
- Easy retrofit for almost any flexo print unit.
- Cold formed stainless steel construction prevents corrosion and warping of the chamber.
- Features a GripTite® doctoring system allows for quick and easy service and maintenance.
