

G2 ProProducts® BLADE STICK-OFF

The Safe Way to Stick a Blade

Effectively Remove Debris

The G2® Blade Stick-Off is carefully handcrafted from soft poplar wood which allows the tip to effectively remove debris from the doctor blade without damaging cylinders. It is strategically bent to allow for accessibility and flexibility, reducing potential cylinder damage.

Standard Features

- Measures 18" in length, safe distance ensures that operator is safe from the tip point.
- Soft poplar tip sharpens by hand or with a pencil sharpener for an extended life.
- Effectively removes damaging particulate from roll cells that would otherwise result in costly print defects.
