

G2 ProProducts® Doctor Blade Angle Gauge

Improve Your Pressroom Productivity

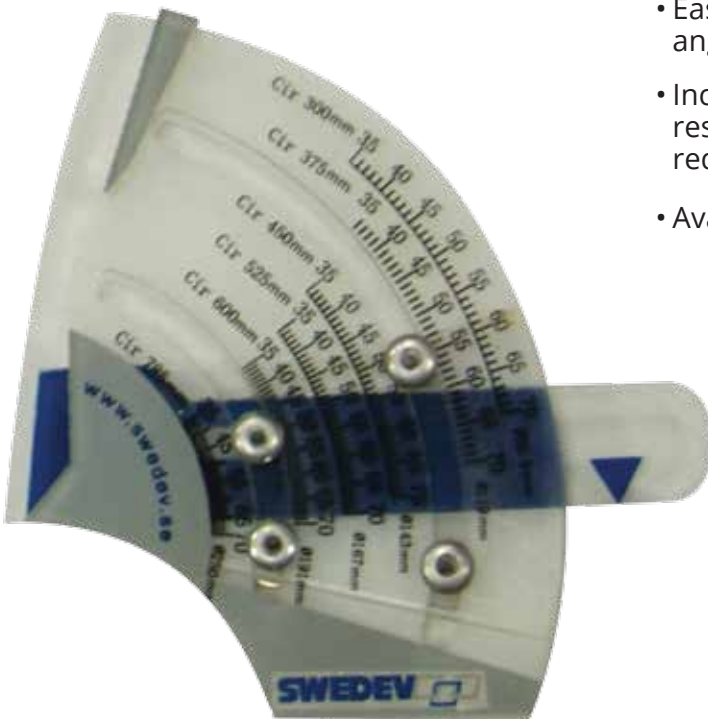

No More Guess Work for Accurate Blade Settings

Our doctor blade angle gauge tool allows experienced operators to achieve the optimal 60° blade angle setting for print excellence. At this specific blade-to-cylinder engagement angle, issues like streaks, haze, fog, and dot fill-in risks are greatly reduced.

Standard Features

- Easy-to-use tool for measuring and control of doctor blade angle setting in gravure printing.
- Increase blade life and enhance the quality of your print results with proper blade angles to decrease edge wear and reduce contact pressure.
- Available in two sizes to fit a range of cylinder sizes:

Model AGA 11.8 x 30.9" (300-785mm)
Model AGB 30.9 x 247.2" (785-6280mm)
