

## G2 ProProducts<sup>®</sup> SJ-210 Surf Test

Surface Roughness Tester

### Portable and Highly Functional for Extensive Analysis

A small, lightweight, and easy to use cylinder surface roughness measurement instrument that allows you to view surface roughness waveforms right on a color LCD screen.

### Standard Features

- User-friendly handheld tool that can be carried with you and used on-site in pressrooms.
- Back-lit color LCD screen provides excellent readability and an intuitive display that is easy to negotiate with improved visibility in dark environments.
- In addition to calculation results, the SurfTest SJ-210 displays sectional calculation results, assessed profiles, load curves, and amplitude distribution curves.
- Offers many features in a compact body including: extensive display features, high-speed USB communication, memory card support, multilingual support, drive unit, and more.

Your experts for pressroom  
efficiency through  
advanced technology ink  
metering solutions.
