

G2 ProProducts® Roto Brush

Improve Your Pressroom Productivity

Safely Clean Cylinder Cells While Press Is Running

The G2 Roto Brush® is an easy to use tool featuring a tubular UHMW plastic handle with a 1" replaceable nylon micro fiber brush insert to clean out rotogravure cylinder cells while the press is running. The tubular handle keeps the operator safe from injury.

Standard Features

- Replaceable Nylon fiber brush is firmly mounted into the handle and is trimmable as it wears - nylon fibers are able to withstand harsh pressroom chemicals and inks.
- 18.875" UHMW plastic handle provides a safe distance for operator to prevent injury.
- Effective on cold seal and other coating applications.
- Nylon fiber brush last for months of cleaning depending on usage frequency.
- Package includes (1) Rotobrush handle and (6) brushes
Replacement brushes available in quantities of (6).
