

G2 ProProducts® Quick Change Blade Holder

Rotogravure

Improved Performance, Improved Productivity

The G2® Sure 60° RotoPro Quick Change Blade Holder is engineered to achieve the optimal 60-65° blade-to-cylinder contact angle, positioning firmly against the cylinder while accommodating for any type of surface irregularities.

Standard Features

- Single-action cam release assures quick and accurate doctor blade changes every time.
- No bolts to loosen and tighten.
- Reduces blade change times to just a few minutes.
- Ability to preset blade angles to improve ink metering.
- Thousands already in service in the industry.
- Disassembles in seconds for easy cleaning.
- Compatible with a wide range of OEMs and custom applications, a great cost-effective retrofit.

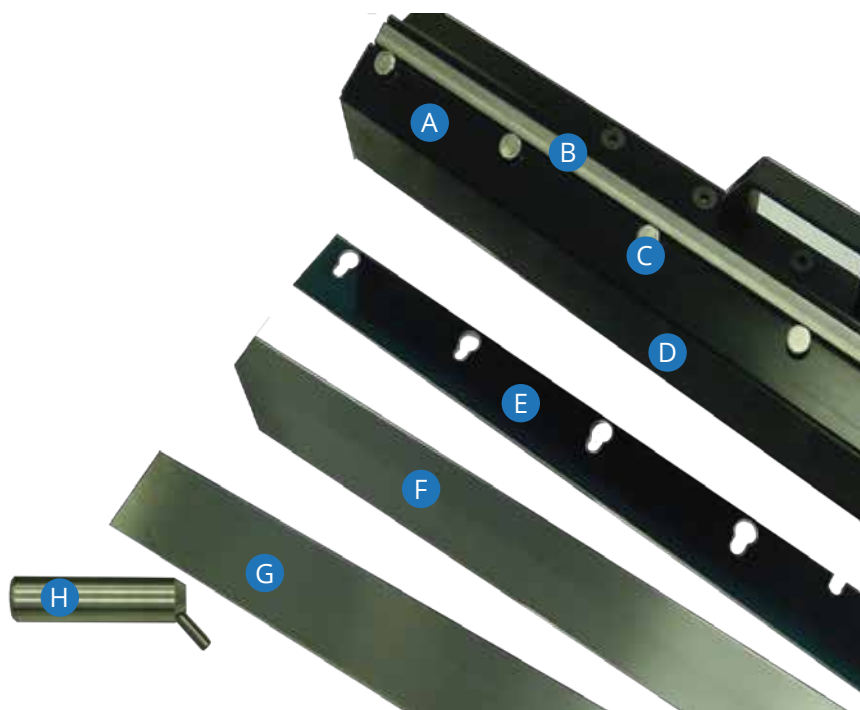

Your experts for pressroom
efficiency through
advanced technology ink
metering solutions.
