

SAFETY + FIRST® Magnetic Doctor Blade Guard

Protect Pressroom Staff & Blade's Critical Edge

Prevent Accidents When Working Near Blades

The **SAFETY+FIRST®** Magnetic Doctor Blade Guard is an essential component to your pressroom safety program. It **protects pressroom staff from cuts** when working with doctor blades and also **protects the blade's critical metering edge when not in use**.

Standard Features

- Ridged U-shaped high-density extruded composite plastic with magnetic strip for ease of use.
- Easily removable and reusable.
- Prevents damage to critical metering edge.
- Prevents accidents when working with blades.
- Available up to 120" cut lengths - guards for single blade holders will be cut 2" longer than your doctor blade length.

Common Uses

The **SAFETY+FIRST®** Magnetic Doctor Blade Guard is ideal for use as a Standard Operating Practice and part of your Best Safety Practices when:

- A new blade is placed in a holder.
- Transporting a blade in holder to a press.
- A blade is not actively engaged.
- Removing a blade holder from a press.

Pairs well with **SAFETY+FIRST®** Doctor Blade Gloves for additional safety protection!
